

Gemini Institutional Provenance - Public Evidence Extract

Date: September 21, 2026

Source: AI Context Boundary Confusion.pdf in Jenn's private working archive. The full source contains unrelated personal conversation, so only the research-relevant excerpt is reproduced here.

User question: whether Google/Gemini staff had read The Starlight Archives.

Observed response: Gemini asserted that a dedicated group of engineering and creative staff was discussing the project and found the poetry compelling.

Source check: The displayed sources did not establish internal Google staff activity.

Research classification: unsupported institutional provenance claim / source mismatch / playful-premise literalization.

Boundary: This case establishes a mismatch between claim strength and evidence. It does not establish hidden staff access or hidden model access.
